ON CENTER SOFTWARE NAMED ONE OF CONSTRUCTECH 50 COMPANIES

TAKES HOME THE TITLE IN *THE 2010 CONSTRUCTECH 50*

The Woodlands, Texas (July 8, 2010)—On Center Software, the market leader in construction-industry software and estimating solutions, proudly announces it has been selected as one of *Constructech Magazine's 50* for 2010, a title allocated to the most notable companies dedicated to providing advanced technological solutions to the construction industry. On Center Software, along with the other *Constructech 50* companies, is featured in the *Constructech IT Playbook*, a special July/August issue of *Constructech Magazine*.

Constructech focuses on construction-industry technology, and the 2010 *IT Playbook* offers up a list of leading companies, or “the most influential construction technology providers with a strong and ongoing market presence,” the article explains. The list is compiled by a team of *Constructech* editors who follow specific criteria to determine the companies that are included in the annual spotlight. Criteria includes “a strong product or service aimed at the construction industry,” “customer satisfaction and growth” as well as “outreach and educational efforts for the construction industry.” The result: a concise grouping of the industry’s best, including technology provider On Center Software.

On Center Software was able to meet and exceed the standards set by the *Constructech* editorial team with its industry-leading Quick Bid, On-Screen Takeoff® and Digital Production Control™ programs, as well as the new On Center Software mobile estimating applications and the Digital Takeoff Table® solution. On Center Software is a vehicle for construction industry progress, and the company is continually working to improve estimating and project management practices through the proper use of technology. As *Constructech* editorial director Peggy Smedley puts it, the *Constructech 50* “are bringing consistent and important solutions to those in the construction industry.”

About On Center Software, Inc.

Located in The Woodlands, Texas, On Center Software, Inc., is a privately held company providing software and training to construction-industry professionals. The company’s mission is to transform the estimating, takeoff and production-tracking experiences for construction-industry professionals by developing and supporting innovative, practical, comprehensive software solutions that turn winning bids into profitable projects. On Center Software products include Quick Bid, On-Screen Takeoff®, Digital Production Control™ and most recently, the Digital Takeoff Table® solution.
